

12. A composition according to Claim 11, wherein the SCC polymer contains at least 5% by weight of second repeating units which contain at least one radical selected from oxygen-containing groups, nitrogen-containing groups, fluorine-containing groups, and silicon-containing groups.

13. A composition according to Claim 12, wherein the second repeating units are derived from one or more of an N,N-dialkylamino acrylate, an N,N dialkylamino methacrylate, N-vinyl pyrrolidinone, an hydroxyalkyl acrylate, an hydroxyalkyl methacrylate, an alkoxyalkyl acrylate and an alkoxyalkyl methacrylate.

14. A composition according to Claim 13, wherein the second repeating units are derived from one or more of hydroxyethyl acrylate, N-vinyl pyrrolidinone and dimethylaminoethyl acrylate

15. A composition according to Claim 11, wherein  $T_g$  is 40-50 °C.

16. A composition according to Claim 11, wherein the SCC polymer is substantially free of ionizable groups.

17. A composition according to Claim 11, wherein the SCC polymer is substantially free of functional groups.

#### REMARKS

Claim 1 has been restricted so that in alternative (i) of paragraph (d), the only possible oxygen-containing groups are hydroxyalkyl and alkoxyalkyl groups (basis for this amendment is on Page 7, lines 3-6 and 20-26). Claim 1 has also been amended to remove the reference to exemplary silicon-containing groups.

New claims 5-17 have been added. Claims 5-10 are dependent (directly or

indirectly) on Claim 1. Claim 11 is a new independent Claim, and claims 12-17 are dependent (directly or indirectly) on Claim 11. Basis for the new claims will be found as follows.
